LAL Reagent Water

endotoxin free, sterile

LRW is intended for reconstitution of LAL reagents and CSE, and to dilute samples and standards for LAL assays. LRW is not for human or animal injection

LAL Reagent Water is equivalent to Water for Bacterial Endotoxins Test (BET).

Contains <0.005 EU/ml endotoxin.

Tris Buffer 50 mM

endotoxin free, sterile

Tris buffer can be used in place of water as the sample diluent for highly acidic or basic samples (samples and sample dilutions should be between pH 6-8). Tris buffer may be used to prepare samples for any of our endotoxin detection assays.

Contains <0.005 EU/ml

Sodium chloride

0.9% physiological

saline endotoxin

free, sterile

Sterile and endotoxin-free physiological saline.

Use for the dilution of endotoxin-free reagents

Use for in vitro only (BET)

Contains <0.005 EU/ml endotoxin.
